

CROSS DOMAIN SECURITY PRINCIPLE 1: **NETWORK PROTOCOL ATTACK PROTECTION**

Cross domain solutions built on Deep Secure technologies:

- ✓ **Use hardware to enforce independent flows for importing and exporting data**
- ✓ **Use protocol breaks to stop network level attacks**

Delivering protection from attackers on connected networks

 **DEEP SECURE**

YOUR COMPLETE CROSS DOMAIN SOLUTION PROVIDER

In January 2021 the UK National Cyber Security Centre (NCSC) published the 13 security principles that should be used to guide the development and deployment of cross domain solutions. Deep Secure is the only vendor offering Commercial Off The Shelf (COTS) software that enables an organisation to build cross domain solutions that conform with the entirety of this guidance.
